|-------------------------|---------------------------------------|
| 1. Main lock entrance   | 6. SeaWood Terminal                   |
| 2. Queen Alexandra Dock | 7. Cold Stores                        |
| 3. Roath Dock           | 8. Ryan Transport                     |
| 4. Our offices          | 9. Bulk Handling Berth                |
| 5. North Side Terminal  | 10. M4 motorway & main line rail link |

The main lock system can handle handy-size vessels of 37,000 DWT up to 27m beam & 198m length. The lock is open to shipping for approximately 8 hours per tide (two tides per day).

The normal water level in both Queen Alexandra and Roath Docks is 11.3m. The total water area of these docks is 34 hectares (85 acres). The quay length of Queen Alexandra Dock is 2,234 metres, and Roath Dock 2,181 metres.

There is ample undercover shed space available totalling 65,000 sq metres (700,00 sq ft). Also cold storage of 38,600 cu m capacity.

We have a fleet of 27 forklift trucks and handling equipment ranging from 2 to 40 tonnes SWL and our own weighbridge facility.

Cardiff is well served for quayside cranes with 10 cranes from 5 to 15 tonnes SWL, 2 container cranes up to 30 tonnes SWL and 2 mobile crane companies located on the Port Estate for any exceptionally heavy lift requirements.

Both North Side and SeaWood Terminals have excellent rail connections linking them to the main line rail network, nearby freightliner and international rail terminals.

The M4 motorway is literally on the doorstep of the port estate and easily accessible.

Communications are exceptional at Cardiff - apart from excellent road and rail connections. There is a heliport on the Port Estate and Cardiff has it's own International Airport.

# CARDIFF - GLOBALLY ACCESSIBLE

On your next voyage  
make Cardiff your  
successful port of call  
and discover the  
wonders of the "seven  
'C's" with us:
